FinPilot AI Competition Submission Cover and Requirements Checklist

Team member 1	Team member 2
Institution:	Institution:
Email:	Email:

I. Entry Identification

Project	FinPilot AI — Your money, understood.
Competition	2026 Shenzhen International FinTech Competition, International Track
Selected topic	Topic A: Personal Finance Assistant
System scope	Synthetic sandbox; budgeting, bill analysis, spending insights and approved agent actions
Repository	https://github.com/Shariar-Joy/finpilot-ai
Team name / registration ID	
Contact email / phone	

II. Two-Member Team Information to Complete

Field	Member 1	Member 2
Full name		
Institution		
Institution country		
Nationality		
Degree / study year		
Email		
Contribution to confirm		
Signature / date		

No identity, enrollment, nationality, contribution or signature has been asserted. The supplied appendix specifies 2–5 full-time students at eligible overseas institutions and at least 60% non-Chinese nationals. For a two-person team, meeting a threshold of at least 60% requires both members to be non-Chinese nationals. Eligibility, single-team participation and final track assignment must be confirmed with the organizer using the actual team details [1].

III. Submission Materials and Status

Requirement	Prepared artifact	Final action
Technical documentation	IEEE-style technical paper: architecture, algorithms, security design and evaluation	Fill two author blocks; review claims
Security self-assessment	Separate permission-tier/control/risk report	Team review and blank sign-off fields
Source code	GitHub source, README, migrations, setup/deployment guide and tests	Confirm repository access for judges
Execution evidence	Actual sandbox audit JSON, screenshots, command logs and reproduction guide	Attach artifacts and actual recording if required
Presentation	Optional Gamma prompt archived separately; no deck prepared	Create and review a presentation of at most 10 minutes
Demo video	Actual 81-second captioned WebM and reproduction script	Review the clip; confirm accepted upload format

IV. Requirements Crosswalk

Topic A's budgeting requirement maps to monthly category CRUD, usage thresholds, server-computed recommendations and approved next-month proposals. Bill analysis maps to recurring-payment inference with source evidence and in-app reminders. Spending insights map to same-period comparisons, category charts and transparent unusual-purchase flags. Task execution is demonstrated by an actual accepted budget update and a separate rejected proposal with unchanged financial arrays. Security evidence includes user ownership, exact approval binding, replay/tamper/expiry rejection, concurrency checks and sanitized decisions. Innovation and interaction are supported by visible tools, citations, exact review, a deterministic no-key path and accessible responsive views. These mappings are evidence references, not predicted scores.

V. Deadline and Submission Review

The supplied appendix gives the deadline as **20 October 2026, 23:59 Beijing time (UTC+8)**, equivalent to **20 October 2026, 21:59 in Bangladesh (UTC+6)**. English is required. Updates before the deadline are permitted and the latest version prevails according to the supplied rules. Confirm any later organizer notice and the actual registration portal before submitting. The appendix requires at least one finalist to attend in person and describes the organizer's IP/independence terms; those obligations require review by the team [1].

- ☐ Complete both members' identity and enrollment/nationality checks; register only once per participant.
- ☐ Review AI-assisted code/document preparation against the organizer's independence and disclosure rules. Do not sign an inaccurate originality or authorship declaration.
- ☐ Check third-party component/template licenses and attribution; no original competition PDF is redistributed by the repository.
- ☐ Reproduce the keyless task and inspect exact budgets, source references and actual audit events.
- ☐ Distinguish local tests, remote CI, mocked provider tests and unverified deployment capabilities in the submitted claims.
- ☐ Create the requested presentation separately; verify timing and remove invented metrics or visual claims.
- ☐ Review the supplied real recording and clarify any remaining format requirement. Attach the correct files and verify final upload access.

VI. Declaration Fields for the Team

I/we have reviewed the source, evidence, third-party notices, and statements in the submission, and will complete the organizer's official declarations using accurate information. The following fields are intentionally unexecuted:

Member 1 name: _____ Member 2 name: _____

Signature/date: _____ Signature/date: _____

This cover is a preparation aid, not an organizer-issued registration form or legal attestation.
